ASSO LINE

Elementi scorrevoli per basi ad angolo
Sliding elements for corner base units
Éléments coulissants pour armoires de base angulaire

ASSO LINE

A PROPOSITO DI ASSO

Asso è una linea di elementi estraibili per basi ad angolo con finiture in alluminio. Disponibile nella versione compatta ad 1 meccanismo oppure a meccanismi estraibili indipendenti con 2, 3 e 4 piani, ha la piantana portante in alluminio regolabile in altezza. Ciascun meccanismo che permette il movimento di estrazione (speciale progetto sviluppato all'interno dell'azienda e brevettato) ha una capacità di carico di kg 30. Asso è proposto anche con 2 differenti altezze delle bordature: bassa H 60 mm ed alta H 100 mm, offrendo maggiore capienza per ciascun ripiano.

ABOUT ASSO

Asso is a pull-out system line for corner units with aluminum finishes. Available in a 1 compact mechanism version or independent extractable mechanisms with 2,3 and 4 shelves, it has an aluminum bearing pedestal which is adjustable in height. Evrey mechanism that allows the extraction movement (special project developed within the company and patented) has a loading capacity of 30 kg. Asso is proposed also with 2 different border heights: the low 60 mm and the high 100 mm, offering more capacity in evrey shelf.

A PROPOS DE ASSO

Asso est une ligne des éléments extractible pour armoires angulaire avec finitions en aluminium. Disponible dans la version compact avec 1 mécanisme ou à mécanismes extractibles indépendantes avec 2,3 et 4 étagères, a le mât porteur en aluminium réglable en hauteur. Chaque mécanisme qui permet le mouvement d'extraction (spécial projet développé dans l'entreprise et breveté) a une capacité de charge de 30 kg. Asso est proposé aussi avec 2 différentes hauteurs des bordures: basse H 60 mm et haute H 100 mm, en offrant plus de contenance pour chaque étagère.

I PUNTI DI FORZA

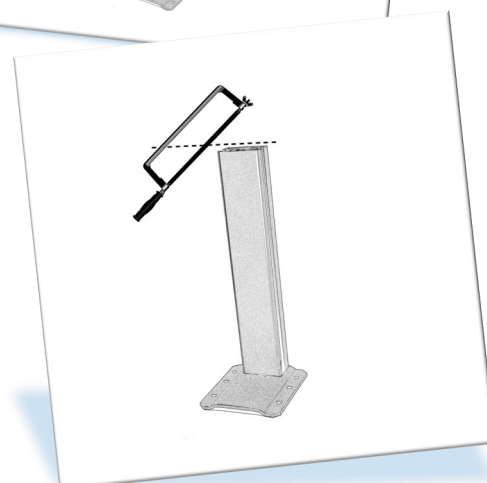

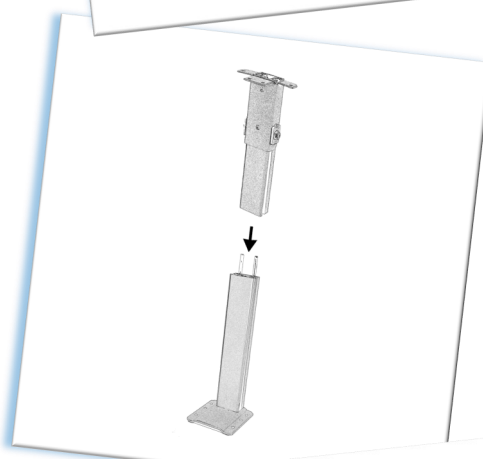

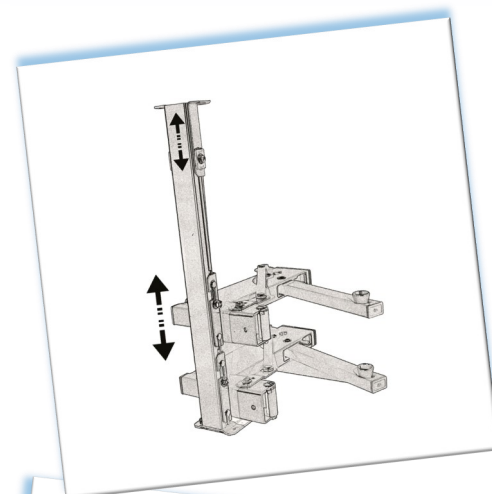

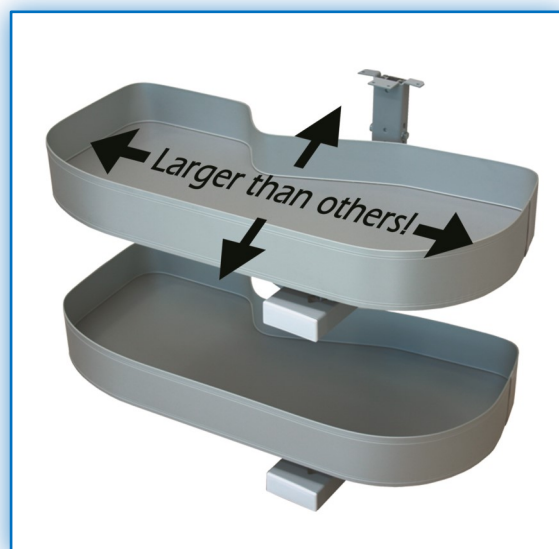

- FACILE DA MONTARE
- Piani più larghi e capienti rispetto ad altri.
- Per un'ulteriore praticità ed utilità del prodotto, è stata realizzata una piantana di sostegno in alluminio, che abbinata ad alcune soluzioni tecniche, permettono una regolazione millimetrica progressiva: è possibile fissare i ripiani estraibili a qualsiasi altezza e di regolarne la posizione ogni qualvolta sia necessario.
- Per gli articoli con 3 e 4 piani, al fine di migliorare la praticità del trasporto e l'ingombro, la piantana viene prodotta in due parti unibili tra loro tramite pratiche spine di innesto in acciaio.
- Per venire incontro a tutte le necessità, le piantane in alluminio possono essere tagliate in qualunque momento a misura desiderata.

THE STRENGTHS

- EASY TO MOUNT
- Larger shelves with more capacity than other.
- For further convenience and usefulness of the product was made a pedestal in aluminum, which combined with some technical solutions, allow precise progressive adjustment: you can attach the pull-out shelves to any height and adjust it whenever you need.
- For items with 3 and 4 levels, in order to improve the practicality of the transport and the dimensions, the pedestal is produced in two parts and can be joined together by practical steel pins for insert.
- For all needs, the aluminum pedestal can be cut at any time to the desired size.

POINTS FORTS

- FACILE À MONTER
- Étagères plus large et spacieuses par rapport à d'autres
- Pour plus de commodité et utilité du produit a été faite un mât en aluminium, qui, combiné avec des solutions techniques, permet un ajustement progressif précis: il est possible accrocher les étagères à toute hauteur et réglée chaque fois que vous avez besoin.
- Pour les éléments avec 3 et 4 étagères, afin d'améliorer l'aspect pratique de transport et les dimensions, le mât est réalisé en deux parties et peuvent être liés ensemble par des pratiques connecteurs d'acier.
- Pour faire face à tous besoins, le mât en aluminium peut être coupé à tout moment à la taille désirée.
